

WHAT TO DO IF CHILD FALLS ILL WITH SUSPECTED C-19

What happens next?

The family of the child with suspected symptoms will be telephoned by the office team.

On collection. CD or CM will explain that they must get a test OR self isolate for 7 days before returning.

If the test comes back POSITIVE, the rest of the bubble will be told to self isolate for 14 days. This means the closing of the Bubble.

If the test is NEGATIVE the child will return with immediate effect.

NB This procedure is exactly the same for an adult working in school
